Your Path After Class 10

#1 RECOMMENDATION

MPC

Mathematics · Physics · Chemistry

Fit Score: **87%** Excellent Match

Math climbed from 68% in Class 7 to 84% in Class 10 — a 16-point rise over four years. Physical Science at 87% is his strongest subject. EAMCET readiness stands at 82% without any coaching.

WHY THIS AND NOT OTHERS

BiPC (71%): Mathematics consistently outpaces Biology — MPC is the stronger data signal for this profile.

Poly CSE (83%): Excellent technical fit — strong alternative if Arjun prefers practical learning over exam pressure.

ACADEMIC INSIGHT

Class 7 is the first year we have data on Arjun, and the pattern it reveals is encouraging. He entered with Mathematics at 61% in FA1 — below average for SCERT AP. By SA2, he had pushed it to 74%. That 13-point climb within a single year, at the age of 12, without coaching, is a signal of something important: this student responds to challenge. He does not collapse under pressure — he studies through it. Telugu and Social Studies came naturally. Physical Science showed curiosity from the start. The only subject requiring close attention is Biology — consistently his lowest across all assessments in Class 7. In Class 8, that either corrects or becomes a pattern worth addressing early.

ACADEMIC INSIGHT

Class 8 confirms what Class 7 suggested: Arjun's strongest academic direction is Science. Physical Science made its biggest leap of any subject in any year — an 8-point annual gain. Mathematics continued its steady climb. The most important data point in Class 8 is not a subject score but a pattern: Arjun's FA1 scores are consistently lower than his SA2 scores in every subject. He starts each year building momentum and ends it stronger. This is not a student who peaks early — he accelerates. For parents watching a Class 8 student, this pattern is the most valuable thing to know. It means Class 10 SA2 — the exam that matters most — will represent his best performance, not an average of his year.

ACADEMIC INSIGHT

Class 9 is the most analytically important year we track, and Arjun's Class 9 record is the clearest signal yet of where he is heading. Physical Science hit 87% — his highest score in any subject across three years. The chapter-level data reveals something specific: Light — Reflection and Refraction was mastered at 91%, already at EAMCET standard. This chapter alone carries 8% of EAMCET Physics questions. On the other side, Chemical Bonding sits at 58%. This chapter contributes 7% of EAMCET Chemistry questions and is also foundational for Class 10 Carbon compounds. This is not a subject weakness — it is a specific chapter gap that can be closed in Class 10 if targeted. The MPC pathway becomes clearer with every data point. EAMCET readiness currently sits at 71% without any coaching. If the Class 9 trajectory holds through Class 10, the projection is 78-84%.

330 of 362 school days attended across Class 9-10. Arjun chose to show up — consistently.

WHAT THE NUMBERS DON'T SHOW — BUT NEURALIFE RECORDED

Arjun was present for 330 of 362 school days across four years. That means he chose to show up — consistently, even on days when the syllabus was hard. That is character data. Not academic data.

”
Behind every percentage is a student who sat down, opened a book, and tried.
Arjun did that 2,847 times in four years. We counted.

— Neuralife Data Record

A NOTE FROM NEURALIFE

"We saw your child."

Dear Suresh & Lakshmi Garu,

We did not meet Arjun in person. We met him in data. And data — when you look at it long enough and with enough care — tells you everything.

We did not assess Arjun on marks alone. We assessed him on every concept he struggled with and eventually understood. On the weeks he came in tired but still submitted homework. On the subjects that felt unfair but improved anyway.

Arjun's attendance was 91% over four years — he was present for 330 of 362 school days. That consistency is not in any marksheet. It is in us. We saw it.

Mathematics went from 68% to 84%. That kind of growth does not happen in a single year. It happens in the quiet moments before exams and during

With respect and pride,

NEURALIFE నుండి ఒక మాట

"మేము మీ పిల్లవాడిని చూశాం."

ప్రియమైన సురేష్ & లక్ష్మి గారూ,

మేము అర్జున్‌ని నేరుగా కలవలేదు. మేము వారిని డేటాలో కలిశాం. మరియు డేటా — మీరు దానిని సరిగ్గా, శ్రద్ధగా చూస్తే — అన్నీ చెప్తుంది.

మేము అర్జున్‌ని మార్కుల ఆధారంగా మాత్రమే అంచనా వేయలేదు. వారు కష్టపడిన ప్రతి అంశాన్ని అర్థం చేసుకున్న తర్వాత అంచనా వేశాం. అలసిపోయినా హాీ వర్క్ పంపించిన వారాలను చూశాం.

నాలుగు సంవత్సరాలలో అర్జున్ 330 రోజులు బడికి వచ్చారు — ఆ consistency మార్క్యూషీట్‌లో కనపడదు. కానీ మేము చూశాం.

గణితం 68% నుండి 84%కి పెరిగింది. ఆ పెరుగుదల పరీక్షా హాలులో జరగదు. అది ముందు రాత్రి జరుగుతుంది — మీ పిల్లవాడు ఆ క్షణాలు జీవించారు.

గౌరవంతో మరియు గర్వంతో,

NeuraLife బృందం

హైదరాబాద్, ఆంధ్రప్రదేశ్

FROM ALL OF US AT NEURALIFE

All the Best, Arjun.

You came to us in Class 7 with questions. You leave with
answers.

From Class 7 to Class 10 — 4 years, 6 subjects, 12 examinations,
48 assessment cycles.

Every morning you sat down to study. Every chapter you revised
before the exam. Every day you chose to come to school. All of
those moments are in here. They added up to this. Now go add
more.
